Instruction to the users for Location Tracker Mobile Application

It has been noticed that user's data for location tracker is not completely sync with the total installed capacity. In high features smart phones users need to open the application once at 10:00 am. To open the application users, need to just click once and minimize the same. Don't close the application in working hours i.e. from **morning 10-00am to Evening 06-00pm, application need to be on mandatorily.** User can access their location report **(Location track Report Date wise)** through the MIS URL, no need to login for reports. This way users can get ensure that their location is being shared to HQ, PHED through location tracker. **As server takes the location after each 25 minutes approx.** In case you logged in and location not showing in the report wait for 25 minutes, and location will be surely available to the logged in users.

Note – Application has been made with the high security features, Smart Phone users of Samsung, Redmi, OPPO, VIVO & Lenovo need to mandatorily on the application including the internet access and Location once at 10:00am irrespective of location wherever they are.
